	Saturday 12 July	Sunday 13 July
How windy? (On the summits) Effect of wind on you?	South to southeasterly winds 10mph or less. Rising to 15mph through afternoon. Negligible much of the day.	Southeasterly turning easterly 15-20mph. Some stronger gusts down western slopes early, notably southern/Three Peaks area. Fairly small - notable buffeting gusts in western areas in the morning.
How wet? (Precipitation and its impact)	No rain	No rain expected
Cloud on the hills? Chance of cloud free summits?	Fells clear Chance of some local patches of fret on lowest eastern slopes of N Pennines, soon clearing for cloud-free fells. Almost certain	No cloud expected Above 90%
Sunshine? Air clarity (below cloud)	Widespread strong sunshine; beware sunburn, dehydration and heatstroke. Excellent visibility on high ground but hazy to the south at lower levels.	Sunny at dawn, then patchy high cloud building, at times shrouding sun. Excellent visibility.
How Cold? (at 700m) And in the valleys	17C rising to 21C by mid-afternoon, eastern N Pennines slightly cooler. Remaining warm overnight. Soon 20C, rising to 26 to 29C by mid-afternoon.	16C rising to 19C. Easternmost fells of N Pennines may stay a degree cooler. 11 to 13C at dawn - coolest temperatures in eastern N Pennines. Rising to 24C, slightly cooler easternmost areas.

Planning Outlook

All mountain areas of Britain from Saturday, 12 July, 2025

Very warm or hot conditions this weekend in the mountains and the valleys, with extreme risk of wildfire in Scotland; beware dehydration and sunburn. Light winds and very little cloud.

Low pressure returns late Sunday into Monday bringing rain to most, risk heavy or thunderstorms north England and Scotland. Temperatures will cool towards average and often raining for the first half of the week. Becoming more mixed from mid-week as pressure goes slack and Atlantic fronts make only weak pushes from the west. Patchy rain and cloud will come and go with the best opportunities for sun in north and western areas.
