## General Summary for Saturday, 1 August, 2026

### British Mountain Summary:

#### Based on forecast chart for noon 1 August, 2026

England and Wales extensively dry with periods of sun and particularly Wales fairly light wind. Increasingly showery northwards across Scotland, although mostly confined to afternoon eastern mountains. Fairly chilly, particularly morning.

### Headline for Yorkshire Dales & North Pennines

Light wind; periods of sun. Small risk brief shower.

## Detailed Forecast for Saturday, 1 August, 2026

|                                                   |                                                                                                                                    |
|---------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| <b>How windy? (On the summits)</b>                | Westerly 15-20mph.                                                                                                                 |
| <b>Effect of wind on you?</b>                     | Small.                                                                                                                             |
| <b>How wet?</b><br>(Precipitation and its impact) | <b>Rain very unlikely</b><br>Isolated, if any, brief showers                                                                       |
| <b>Cloud on the hills?</b>                        | <b>Early cloud clears the fells</b><br>At dawn, may be fairly extensive above 500 or 600m, but will all clear through the morning. |
| <b>Chance of cloud free summits?</b>              | <b>Almost certain by midday</b>                                                                                                    |
| <b>Sunshine?</b><br>Air clarity (below cloud)     | Patchwork of bright sun; cloud filling in at times.<br>Very good becoming excellent or superb visibility.                          |
| <b>How Cold? (at 700m)</b>                        | 9C at dawn rising to 13C.                                                                                                          |
| <b>And in the valleys</b>                         | 9C at dawn rising to 20C afternoon.                                                                                                |

|                                                   | Sunday 2 August                                                                                                   | Monday 3 August                                                                                                                                                                                                                            |
|---------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>How windy? (On the summits)</b>                | Varied direction, 10mph or less.<br>Will become easterly in afternoon, and toward dusk begin to strengthen.       | Easterly 20 to 25mph, perhaps sometimes 30mph; very gusty in places.                                                                                                                                                                       |
| <b>Effect of wind on you?</b>                     | <b>Negligible.</b>                                                                                                | <b>Sometimes fairly small, but expect sudden gusts (sometimes on lower slopes) making balance tricky.</b>                                                                                                                                  |
| <b>How wet?</b><br>(Precipitation and its impact) | <b>Rain very unlikely</b><br><br>Small risk rain toward or more likely after dusk.                                | <b>Rain now and again</b><br><br>Low confidence as general of low pressure develops across Britain: Occasional rain likely, mostly afternoon or evening, when there may be heavy bursts.                                                   |
| <b>Cloud on the hills?</b>                        | <b>Not expected</b>                                                                                               | <b>Patches may form in rain</b><br><br>Most, possibly all hills cloud free, perhaps all day.<br>But in rain, most likely only later in day fog may begin to shroud some higher slopes, and possibly here and there extend to lower slopes. |
| <b>Chance of cloud free summits?</b>              | <b>Almost certain</b>                                                                                             | <b>70%</b>                                                                                                                                                                                                                                 |
| <b>Sunshine?</b><br>Air clarity (below cloud)     | Sunshine will give way in afternoon as high cloud thickens.<br>Slight haze clearing to give excellent visibility. | Some weak sunshine through thin high cloud (most widely Yorkshire).<br>Some haze, although generally very good visibility.                                                                                                                 |
| <b>How Cold? (at 700m)</b>                        | 9C rising to 16C.                                                                                                 | 13C                                                                                                                                                                                                                                        |
| <b>And in the valleys</b>                         | Will reach around 22C in the afternoon.                                                                           | 19 to perhaps 22C Yorkshire dales in afternoon.                                                                                                                                                                                            |

## Planning Outlook

## All mountain areas of Britain from Sunday, 2 August, 2026

Still a few showers W & NW Highlands on Sunday, and threat of some rain by dusk western mountains. The rain will be ahead of a very complicated weather pattern early next week; areas of rain will drift slowly across central and mainly northern Britain, but the distribution of rain (and associated low cloud) remains very uncertain.

Despite some recent rain (mainly in Scotland), away from the W & NW Highlands terrain remains exceptionally dry: 'tinder dry'.

**Forecast issued at 14:18 on Friday, 31 July, 2026**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
