General Summary for Sunday, 1 November, 2026

British Mountain Summary:

Based on forecast chart for noon 1 November, 2026

A fine day for the Highlands, with sunshine and just patchy cloud around some tops. One or two light showers in northern areas. A weakening front drifts south over England & Wales giving cloudy skies and a little rain for a time, mainly more eastern hills. Light-moderate winds overall, but feeling chilly.

Headline for Yorkshire Dales & North Pennines

A little rain, cloud banks, improving from north; cool breeze.

Detailed Forecast for Sunday, 1 November, 2026

How windy? (On the summits)	North to northeasterly 20mph, at times 25mph higher Pennines in morning, tending to ease a little with time.
Effect of wind on you?	Fairly small effect on walking, but noticeably breezy and rather chilly over high terrain particularly in the morning.
How wet? (Precipitation and its impact)	Some early light rain Patchy light rain mainly over eastern Pennines in the morning, a brief sprinkle of showery rain in places, but fading to just odd pockets of drizzle and becoming largely dry most places into afternoon.
Cloud on the hills?	Low cloud increasingly clears Fairly extensive low cloud across the hills, plus some fog to lower elevations in the morning, but an improving tendency from the north, increasingly clearing with time, for most places during afternoon.
Chance of cloud free summits?	10% rising to 70% afternoon
Sunshine? Air clarity (below cloud)	Rather cloudy and misty around the fells, particularly morning, a gradual improvement from the north to sunny spells and very good visibility.
How Cold? (at 700m)	3 to 5C, slight drop during the day, coolest North Pennines. Feeling like -3C in the breeze on tops.
And in the valleys	6C at dawn, rising to 11C early afternoon, then cooling quickly from sunset.

Yorkshire Dales & North Pennines - Looking Ahead

	Monday 2 November	Tuesday 3 November
How windy? (On the summits)	Northeasterly 15 to 25mph, tending to rise during the day.	East to northeasterly 20 to 25mph, some gusty areas 30mph around higher Pennines, locally downslope to west.
Effect of wind on you?	Fairly small, but feeling chilly over exposed slopes and more noticeably breezy as the day goes on.	Starting to affect comfortable walking on exposed terrain and some more noticeable gustiness affecting balance. Feeling chilly.
How wet? (Precipitation and its impact)	Rain unlikely Chance of a little drizzle if cloud thickens over the eastern side of the Pennines, mainly later in the day.	Some drizzly rain A little light rain or drizzle occasionally, mostly eastern side of the Pennines, patchier westwards.
Cloud on the hills?	Capping some tops at times Patchy cloud may graze higher slopes mostly North Pennines and occasionally highest tops elsewhere, but often lifting above most hills.	Most frequent north, breaks west Cloud banks rolling across high terrain, the base mostly around 700m, perhaps slightly lower in east for a time. Good breaks likely around the Three Peaks, but patches may often cap higher North Pennines.
Chance of cloud free summits?	70%	30% north/east, to 60% western dales.
Sunshine? Air clarity (below cloud)	Occasional sun, mostly toward west and south. Visibility very good, some haze lower down.	Fairly cloudy, a little sun breaking through, mostly western dales. Visibility very good out of cloud.
How Cold? (at 700m)	2 to 4C. Feeling nearer -5C directly in wind.	3 to 5C, coolest North Pennines. Feeling nearer -5C directly in the wind.
And in the valleys	Patchy frost in valleys at first. Rising to 11C afternoon.	6C at dawn, up to 11C afternoon.

Planning Outlook

All mountain areas of Britain from Monday, 2 November, 2026

A settled start to November as high pressure resides toward the north. Largely dry weather throughout the week ahead. Variable cloud will be drawn in from the North Sea on easterly winds, at times some light showers mainly for Pennine areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows. Quiet weather may continue into next weekend, then a trend toward more unsettled conditions into mid-month, possibly colder patterns too.

Forecast issued at 16:00 on Saturday, 31 October, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
