Yorkshire Dales & North Pennines

The entire Yorkshire Dales National Park and North Pennines AONB, including the Three Peaks and Cross Fell, plus Howgills, also south to Forest of Bowland.

Evening with MWIS - Kendal - Thursday 19th November 2026
Classroom weather workshop supporting Kendal Mountain Search and Rescue Team

General Summary for Saturday, 7 November, 2026

British Mountain Summary:
Based on forecast chart for noon 7 November, 2026

Extensively cloudy and dull, some drizzle or light rain, but total amounts small. Areas of fog in places from low terrain upward and cloud banks across hills. Clearest hills generally further west, but limited sun. Generally light wind.

Headline for Yorkshire Dales & North Pennines

Drizzly rain and low cloud widely.

Detailed Forecast for Saturday, 7 November, 2026

How windy? (On the summits)	Easterly or variable 10mph or less.
Effect of wind on you?	**Negligible**
How wet? (Precipitation and its impact)	**Patches of drizzly rain** Total rainfall small, but drizzly rain likely to fall for an hour or two, or in places on and off all day, mainly northeastern Pennines.
Cloud on the hills?	**Varied fog and low cloud** Low cloud will affect most hills, in places fog banks to lower slopes, but especially further west the cloud base at times near or above higher summits for periods.
Chance of cloud free summits?	**30%**
Sunshine? Air clarity (below cloud)	Cloudy or dull and extensively misty or foggy.
How Cold? (at 700m)	5C
And in the valleys	6C at dawn, rising to 8 to 10C.

Yorkshire Dales & North Pennines - Looking Ahead

	Sunday 8 November	Monday 9 November
How windy? (On the summits)	Northwesterly or variable 10mph or less.	Easterly 10mph, or less early in the day, rising a little to 10-15mph up to dusk, slightly stronger after dark.
Effect of wind on you?	**Negligible**	**Small**
How wet? (Precipitation and its impact)	**Patchy drizzle** Local pockets of light or very light drizzle.	**No rain expected** Locally feeling damp where in fog.
Cloud on the hills?	**Extensive; cloud base sometimes very different on nearby slopes** Some local variations, but cloud likely extensive or persistent above 700m. Lower down, fog clinging to many slopes from valleys up all day, whilst others are fog free or between layers of cloud.	**Varied fog and low cloud** Some uncertainty, but cloud likely to fairly extensively cover high terrain, plus areas of fog in the valleys. Some slopes may be clearer between fog layers. Best chance for better breaks on western hills.
Chance of cloud free summits?	**10%**	**30%**
Sunshine? Air clarity (below cloud)	Cloudy or dull with extensive fog - some areas brighter with glimpses of sun developing through day.	Mostly little if any sun. Generally hazy, or foggy.
How Cold? (at 700m)	5C	3C.
And in the valleys	6C at dawn, rising to 8 to 10C.	Patchy frost from dawn. Rising to 7 to 9C by afternoon.

Planning Outlook

All mountain areas of Britain from Sunday, 8 November, 2026

High pressure persists into the start of the new week with light winds for much of Scotland, though an easterly wind will increase for England and Wales. The west and northwest Highlands most extensively dry with cloud breaks and sun. However, disappointing for other areas as 'gloomy' conditions predominate, with patches of light rain and extensive low cloud and fog. Into midweek, an area of low pressure will bring rain and wind in from the southwest but northern Scotland may escape most or all the rain. Late in the week, indications favour a switch to a colder northerly flow for a time in Scotland at least and brings scope for snow showers to northern mountains.

Forecast issued at 8:06 on Saturday, 7 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
