Yorkshire Dales & North Pennines

The entire Yorkshire Dales National Park and North Pennines AONB, including the Three Peaks and Cross Fell, plus Howgills, also south to Forest of Bowland.

Evening with MWIS - Kendal - Thursday 19th November 2026
Classroom weather workshop supporting Kendal Mountain Search and Rescue Team

General Summary for Sunday, 22 November, 2026

British Mountain Summary:
Based on forecast chart for noon 22 November, 2026

Windy across upland Britain, gales some higher areas, particularly Snowdonia. Extensively dry and cold and much terrain will be at least partially frozen. However, cloud progressively thicker southward across Wales, with an almost stationary area of rain South Wales.

Headline for Yorkshire Dales & North Pennines

Upland wind near gale. Chance light shower.

Detailed Forecast for Sunday, 22 November, 2026

How windy? (On the summits)	Easterly 30-35mph, but on highest tops 40mph. Very gusty in some areas, sometimes gusts penetrating to lower slopes.
Effect of wind on you?	**Marked wind chill and sometimes abruptly gusty winds will make balance difficult in places; sometimes on lower slopes.**
How wet? (Precipitation and its impact)	**Precipitation very unlikely** Risk isolated very light showers, giving or snow flurries highest tops.
Cloud on the hills?	**Little if any** Threat patches above about about 600m at times.
Chance of cloud free summits?	**90%**
Sunshine? Air clarity (below cloud)	Bright sunshine although banks of cloud will come and go. Visibility excellent.
How Cold? (at 700m)	2C. Will feel as cold as minus 8C directly in the wind.
And in the valleys	Terrain partly frozen lower slopes, particularly morning out of the sun. Will reach around 5C briefly in afternoon.

Yorkshire Dales & North Pennines - Looking Ahead

	Monday 23 November	Tuesday 24 November
How windy? (On the summits)	Southeasterly 15 to on higher tops 20mph	South to southeasterly, strengthening quickly with height a very gusty 40-55mph. Ferocious gusts; some reaching valleys.
Effect of wind on you?	**Small.**	**Significant wind chill and very difficult walking where exposed. Gusts may well knock you over - even on some lower slopes.**
How wet? (Precipitation and its impact)	**Precipitation very unlikely**	**Rain and snow extending east** An area of snow will extend eastwards, though timing uncertain. Will turn to rain below about 500m.
Cloud on the hills?	**Very little: Confined to highest tops** Banks of cloud may come and go above 700m.	**Forming widely on higher areas in precipitation.** Cloud likely to shroud higher areas most or all day. In precipitation, cloud base will drop, generally to around 500m, sometimes lower kore eastern slopes.
Chance of cloud free summits?	**90%**	**30%**
Sunshine? Air clarity (below cloud)	Periods of sunshine and very good visibility; most haze Yorkshire dales.	Perhaps a little sun, most likely morning before cloud thickens. Hazy, and visibility poor in precipitation.
How Cold? (at 700m)	1C. Will feel as cold as minus 5C in the wind.	0C. Will feel as cold as minus 12C in the wind.
And in the valleys	Some lower areas partly frozen in morning after a frost. Temperatures rising to 7C.	Will reach around 6C.

Planning Outlook

All mountain areas of Britain from Monday, 23 November, 2026

Colder than normal most mountain areas throughout next week. Precipitation and temporarily warmer conditions will occasionally penetrate across most southern and western mountains, but particularly later in the week, freezing level across Britain may drop to a few hundred metres - with much higher terrain persistently frozen. Most considerable snowfall is likely over the SE Highlands and perhaps Scottish Border hills.

Forecast issued at 12:20 on Saturday, 21 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
